-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

1. The specification is objected to as having a typographic therein. In page 2, line 3, the Serial No. shall be 10/304,840. Correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Ammann.

Applicant's apparatus reads on the apparatus of Ammann, though the inventive concepts are different.

4. Claims 1, 3, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Tucker et al.

The fin 15 of Tucker et al. is considered a central area having a plurality of slots (grooves). Thus, applicant's apparatus reads on the apparatus of Ammann, though the inventive concepts are different.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

---

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tucker et al.

Tucker et al. substantially show the invention as claimed except the recesses are in a slot (groove) or rectangular shape rather than a concave shape. However, whether the recesses are in the rectangular shape or in the concave shape is deemed to be nothing more than an obvious matter of design choice since the heating function will be the same.

8. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tucker et al. and further in view of Ammann.

Tucker et al. substantially show the invention as claimed except the heating control means. However, Ammann shows that it is conventional to provide a temperature sensing and control means for a soldering device to optimize the soldering operation. It would have been obvious to provide the soldering device of Tucker et al. with the heating control means of Ammann in view of the advantage.

9. The US patent publication of Sato et al., Parstorfer, Smith et al., Usui, and Ludwig et al. are cited to further show the state of the art.
